

PLANNING PROPOSAL

Amendments to Warringah Local Environmental Plan 2011

MANLY CREEK RIPARIAN LANDS (in the vicinity of "Mermaid Pool", Manly Vale)

February 2019 (submission for Gateway Determination)

TRIM PEX2018/0008 RN2019/026933

Contents

Part 1 – Intended Outcomes	3
Part 2 – Explanation of Provisions	4
Part 3 – Justification	10
Part 4 – Maps	29
Part 5 – Community Consultation	35
Part 6 – Project Timeline	36

Part 1 - Intended Outcomes

The intended outcome of the Planning Proposal is to rezone certain Crown Land parcels within the riparian corridor of Manly Creek, downstream of Manly Dam, Manly Vale from Low Density Residential R2 to Public Recreation RE1 to provide for a range of recreational settings, activities and land uses that are compatible with the values of the land. The proposal will also better protect and enhance the natural environment and the values of the land.

It is also proposed that residential building height and minimum allotment size controls be removed from the land as residential uses will no longer be permitted under the RE1 zone.

Part 2 - Explanation of Provisions

The proposal seeks to amend Warringah LEP 2011 as follows:

Amend Zoning Map (LZN_004) to rezone certain land from Low Density Residential (R2) to Public Recreation (RE1) comprising the following land:

- Part Lot 7370 DP1165551 being land adjoining 102 King Street, Manly Vale
- Part Lot 7369 DP1165551 Wandella Road, Allambie, south of Jenna Close, Allambie
- Lot 7371 DP1165577
- Part unmade road at the southern end of Wandella Road, King Street, Manly Vale

The effect of the rezoning will be that the subject lots will be zoned Public Recreation (RE1) in their entirety (note: some of the above land parcels are currently zoned part Low Density Residential (R2) and part Public Recreation (RE1)).

Some minor consequential amendments to the LEP are also proposed to accompany the rezoning, removing residential development standards for height and minimum lot size from the subject land parcels.

In this regard it is proposed to remove the subject land from the following LEP Maps:

- WLEP2011 Map HoB_00 (Height of Building Map)
- WLEP2011 Map LZN_00 (Minimum Lot Size Map)

The Land

The subject land parcels are contained within David Thomas Reserve and surrounding bushland located in the suburbs of Allambie Heights and Manly Vale below Manly Dam. The land is bounded by low density residential development to the north and south. The land is part of the riparian corridor of Manly Creek.

This creek line corridor of vegetation on and adjoining the subject lots directly connects Manly Dam in the west to Millers Reserve and Warringah Golf Club in the west, before discharging into Manly Lagoon. In this regard the land contributes significantly to an important vegetative link from Manly Dam to the coast and has been included in several local and state ecological studies and databases detailed in this Planning Proposal.

Figure 1 – Aerial Photo of locality

The subject land parcels and bushland form part of a place fondly known by the local community as the 'Mermaid Pool'. The subject land parcels are in the vicinity of this riparian pool with associated waterfall and rock escarpments. This land is the subject of an ongoing community restoration project which gained recognition and impetus under the national Clean Up Australia Day campaign in 2001/2002 and the "Return of the Mermaids" project.

At this time over 4 tonnes of waste was removed from the creek including old ovens, car parts, trolleys and building material. From this event ongoing bush-care volunteers meet monthly to continue regeneration of this community valued place. Other events and workshops run by 'Save Manly Dam Catchment Committee' include educational programs, nesting box installation, drain stencilling, lobbying and advocacy. Council also currently manages and funds a bush regeneration volunteer program at the Mermaid Pool and bush regeneration contracts in the adjacent David Thomas Reserve.

The Zones

The existing zone to be omitted in relation to the subject lands is as follows:

Zone R2 Low Density Residential (existing zone)

- 1 Objectives of zone
- To provide for the housing needs of the community within a low density residential environment.
- To enable other land uses that provide facilities or services to meet the day to day needs of residents.
- To ensure that low density residential environments are characterised by landscaped settings that are in harmony with the natural environment of Warringah.
- 2 Permitted without consent Home-based child care; Home occupations

3 Permitted with consent

Bed and breakfast accommodation; Boarding houses; Boat sheds; Building identification signs; Business identification signs; Centre-based child care facilities; Community facilities; Dwelling houses; Educational establishments; Emergency services facilities; Environmental protection works; Exhibition homes; Group homes; Health consulting rooms; Home businesses; Hospitals; Places of public worship; Recreation areas; Respite day care centres; Roads; Secondary dwellings; Veterinary hospitals

4 Prohibited

Any development not specified in item 2 or 3

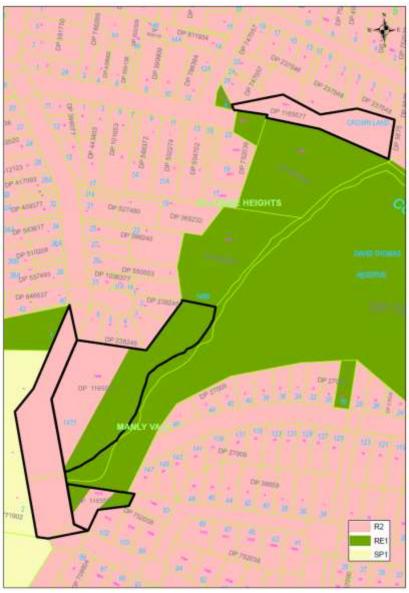

Figure 2 – Existing Zones

The proposed zone land use table for Public Recreation (RE1) in relation to the subject lands is as follows:

Zone RE1 Public Recreation (proposed zone)

- 1 Objectives of zone
- To enable land to be used for public open space or recreational purposes.
- To provide a range of recreational settings and activities and compatible land uses.
- To protect and enhance the natural environment for recreational purposes.
- To protect, manage and restore public land that is of ecological, scientific, cultural or aesthetic value.
- To prevent development that could destroy, damage or otherwise have an adverse effect on those values.

2 Permitted without consent

Environmental facilities; Environmental protection works; Roads

3 Permitted with consent

Boat building and repair facilities; Boat sheds; Building identification signs; Business identification signs; Car parks; Centre-based child care facilities; Community facilities; Emergency services facilities; Kiosks; Recreation areas; Recreation facilities (indoor); Recreation facilities (major); Recreation facilities (outdoor); Respite day care centres; Restaurants or cafes; Water recreation structures

4 Prohibited Any development not specified in item 2 or 3

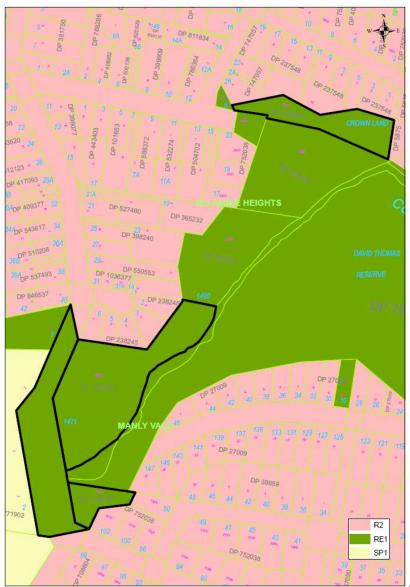

Figure 3 – Proposed Zoning

Related Provisions in the Warringah LEP (Heritage and Land Slip Risk).

Other provisions associated with the land under Warringah LEP 2011 include Heritage and Land Slip Risk.

Councils Heritage Advisor has reviewed the Planning Proposal and provided the following comments:

The land is within the vicinity of a number of local heritage items and a heritage conservation area listed in Schedule 5 of Warringah Local Environmental Plan 2011, as can be seen on attached map, they being:

- Item I144 Manly Hydraulics Laboratory, 110b King Street, Manly Vale Item I84 Manly Dam, King Street, Manly Vale Conservation Area C9 - Manly Dam and Surrounds Conservation Area
- Manly Dam is also listed as a State Heritage item under the NSW Heritage Act (Database No. 5051428). The extent of this State listing can be seen attached, which generally corresponds to local Item 184.

The rezoning of these lots to RE1 will have no adverse impact upon the heritage items in the vicinity nor the Manly Dam and surrounding Conservation Area.

The Warringah LEP maps the subject land as 'Area B – Flanking Slopes' in terms of landslip risk. Consideration is required to be given to risk associated with landslides and their impact on both property and life when assessing applications for development. Furthermore, such development must not cause significant detrimental impacts because of stormwater discharge from the development site or impact on or affect the existing subsurface flow conditions.

The Planning Proposal is consistent with the existing provisions as applicable to the land to be rezoned.

Part 3 - Justification

Section A - Need for the Planning Proposal

1. Is the Planning Proposal a result of any strategic study or report?

The Planning Proposal results from a resolution of Council at its Ordinary Meeting dated 27 November 2018. At this time Council considered Notice of Motion No 65/2018 regarding a variety of land parcels for rezoning in and around Manly Warringah Memorial Park.

Council's resolution regarding parcels of land owned by Sydney Water and the Crown in the vicinity of Wakehurst Parkway, Seaforth is to be subject to separate Planning Proposal.

Part B of the Council's Resolution was as follows:

B. Council prepare a Planning Proposal to rezone two lots owned by the Crown in the vicinity of King Street and Wandella Road from Low Density Residential (R2) to Public Recreation (RE1) under the Warringah LEP 2011. The two lots are identified as:

- Part Lot 7370 DP1165551 being land adjoining 102 King Street, Manly Vale
- Part Lot 7369 DP1165551 Wandella Road, Allambie, south of Jenna Close, Allambie

In this regard a further 2 parcels of are also sought to be incorporated into the Planning Proposal as follows:

- Lot 7371 DP1165577
- Part unmade road at the southern end of Wandella Road, King Street, Manly Vale

A number of existing ecological studies data supports the current Planning Proposal:

- Connected Corridors for Biodiversity project by Southern Sydney Regional Organisation of Councils in December 2016
- Local Habitat Strategy by former Warringah Council in 2007
- Biodiversity Values Map by Office of Environment and Heritage (OEH) in 2018
- Sydney Metropolitan Catchment Management Authority v3 Mapping, OEH 2016
- Warringah Creek Management Study 2000, former Warringah Council
- Native Vegetation DCP Mapping, former Warringah Council
- BioNet threatened species records, OEH 2018

Other existing site-specific and locality information include:

- Manly Creek/Mermaid's Pool Restoration Plan (Total Earth Care 2003)
- Manly Dam ongoing comprehensive species list project (Northern Beaches Council 2018)
- Biodiversity Assessment of nearby Sydney Water land (Sydney Water 2018)

All of the above studies and databases are further detailed in this report in Part 3B – Relationship to Strategic Planning Framework.

Council is also in the process of commissioning a Biological study from independent ecological consultants to provide a full species inventory, determine and map native vegetation, undertake a habitat assessment and targeted surveys for threatened species and provide an independent assessment of the area's function as a wildlife corridor.

The project is expected to be completed by July 2019, and will further inform and support the rezoning planning proposal for various lots currently zoned R2 contained within Manly Creek Riparian Lands, near Mermaid Pool Manly Vale.

2. Is the Planning Proposal the best means of achieving the objectives or intended outcomes, or is there a better way?

The Planning Proposal to rezone the land to RE1 Public Recreation is the best means of achieving the objectives to maintain the use of the land for public open space and recreational purposes and to better protect and enhance the natural environment and the values of the land.

In 2016 the Manly Lagoon Catchment Coordinating Committee sought to have the land rezoned to environmental protection (E1 or E2). Warringah Council subsequently committed to a review of the zoning due to the environmental significance of land, with the Mayor of Warringah seeking support for the rezoning from Member for Manly and the Minister for Lands and Water. Whilst environmental protection zones in the LEP provide a higher level of environmental protection, the extent of the Manly Warringah Memorial Park, the Mermaid Pool and much of the riparian corridor is zoned RE1 Public Recreation. The RE1 Public Recreation is therefore considered the most appropriate means of achieving the intended outcomes of the Planning Proposal.

Section B – Relationship to strategic planning framework

3. Is the Planning Proposal consistent with the objective and actions of the applicable regional or sub-regional strategy (including the Sydney Metropolitan Strategy and exhibited draft strategies)?

The Greater Sydney Regional Plan

The Planning Proposal has been reviewed against relevant outcomes of the Greater Sydney Regional Plan "A Metropolis of Three Cites – connecting people" published on 18 March 2018. The Plan identifies a number of strategic directions and specific policy settings regarding transport, housing growth, employment and centres.

The Planning Proposal is consistent with a number of general goals of the Regional Plan and satisfies a range of objectives as follows:

- Objective 25 The coast and waterways are protected and heathier
- Objective 27 Biodiversity is protected, urban bushland and remnant vegetation is enhanced
- Objective 28 Scenic and cultural landscapes are protected
- Objective 30 Urban Tree Canopy is increased
- Objective 31 Public open space is accessible, protected and enhanced
- Objective 32 The Green Grid links parks, open spaces, bushland and walking and cycling paths

North District Plan

The Planning Proposal supports the North District Plan vision for 'A city in its Landscape' and Directions 'Valuing green spaces and landscape'.

The Planning Proposal is consistent with a number of Planning Priorities of the North District Plan as follows:

- Planning Priority N15 Protecting and improving the health and enjoyment of Sydney Harbour and Waterways
- Planning Priority N16 Protecting and enhancing bushland and biodiversity
- Planning Priority N17 Protecting and enhancing scenic and cultural landscapes
- Planning Priority N19 Increasing urban tree canopy cover and delivering Green Grid Connections
- Planning Priority N20 Delivering high quality open space

4. Is the Planning Proposal consistent with a council's local strategy or other local strategic plan?

A review has been undertaken of the Planning Proposal against certain policies and plans of Northern Beaches Council as follows:

Northern Beaches Draft Community Strategic Plan 2017-2028 'SHAPE 2028'

The Northern Beaches Community Strategic Plan was adopted by the Northern Beaches Council in June 2018 following 2 stages of engagement and drafting in September/October 2016 (developing community issues, priorities and visions) and in March/April 2017 (developing draft goals and strategies to achieve the vision).

The Plan is built around themes of community, place, environment and leadership. The objectives and intended outcomes of the Planning Proposal are supported by the Community Strategic Plan.

Warringah DCP Native Vegetation, and Waterways and Riparian Lands Mapping

The subject lots are identified in the Warringah DCP 2011 as predominantly "Native Vegetation" and to a lesser extent "Waterways and Riparian Lands". The DCP outlines Objectives relating to this land and states that these objectives must be satisfied by technical studies for certain development as follows:

In relation to land identified on the DCP Native Vegetation Map (WDCP2011 Section E5)

- To preserve and enhance the area's amenity, whilst protecting human life and property.
- To improve air quality, prevent soil erosion; assist in improving water quality, carbon sequestration, storm water retention, energy conservation and noise reduction.
- To provide natural habitat for local wildlife, maintain natural shade profiles and provide psychological & social benefits.
- Promote the retention of native vegetation in parcels of a size, condition and configuration
 which will as far as possible enable local plant and animal communities to survive in the long
 term.
- To maintain the amount, local occurrence and diversity of native vegetation in the area

In relation to land identified on the DCP Waterway or Riparian Land Map (WDCP2011 Section E8)

- Protect, maintain and enhance the ecology and biodiversity of waterways and riparian land.
- Encourage development to be located outside waterways and riparian land.
- Avoid impacts that will result in an adverse change in watercourse or riparian land condition.
- Minimise risk to life and property from stream bank erosion and flooding by incorporating appropriate controls and mitigation measures.
- Maintain and improve access, amenity and scenic quality of waterways and riparian lands.
- Development on waterways and riparian lands shall aim to return Group B and Group C creeks to a Group A standard (as described in Warringah Creek Management Study, 2004) through appropriate siting and development of development.

Figure 4 – Native Vegetation and Waterways & Riparian Lands DCP mapping

Local Habitat Strategy (Warringah Council 2007)

This strategy outlines the state of habitat in Warringah and suggests actions Council can take. in partnership with the community, to preserve, protect and restore habitat areas. The Strategy identifies "Local Habitat" which was defined as any area which provides food, shelter and opportunities to breed for native plants and animals, within the former Warringah LGA.

The objectives of this strategy are as follows:

- Local habitat is recognised, maintained and improved throughout Warringah
- Warringah's community values habitat and is actively involved in its protection and improvement

The subject lots are mapped as "existing vegetation" within this strategy (See Figure 5).

The subject lots and surrounding areas, particularly around Mermaid Pools, have undergone significant restoration fuelled by volunteers within the community. In this regard the Strategy objectives are being satisfied in relation to the subject lots. The Biodiversity Study being undertaken in conjunction with the Planning Proposal will provide a more detailed and updated species list and habitat assessment for the subject lots and surrounding land to further establish the value of this habitat for local native species.

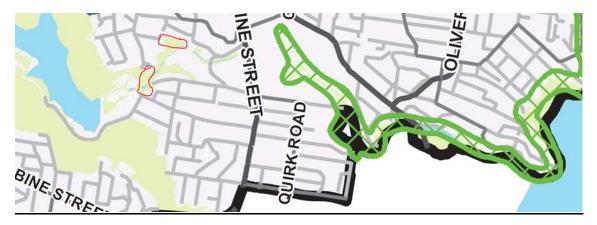

Figure 5 – Local habitat strategy mapping (Warringah 2007), approx. location of subject lots shown in red.

Warringah Creek Management Study 2000

The Manly Creek sub-catchment covers an area of approximately 810 ha. Upstream of Manly Dam, steep headwaters tributaries in the north-western corner of the Manly Dam Reserve flow through natural bushland into the main stream (known as Curl Curl Creek) which feeds into Manly Reservoir. The section downstream of the Manly Dam (known as Manly Creek) flows through a bedrock controlled, discontinuous floodplain, surrounded by parkland and residential development, before flowing under the Condamine Street Bridge and adjoining Brookvale Creek immediately upstream of Passmore Reserve. The catchments surrounding the upper and lower reaches are less than 10% impervious and over 30% impervious, respectively. Major users of the creek's water include research laboratories and Warringah Golf Course.

Figure 6 shows a core riparian zone of approximately 30m in total width with an additional buffer zone of approx. 5-10m on either side of the creek.

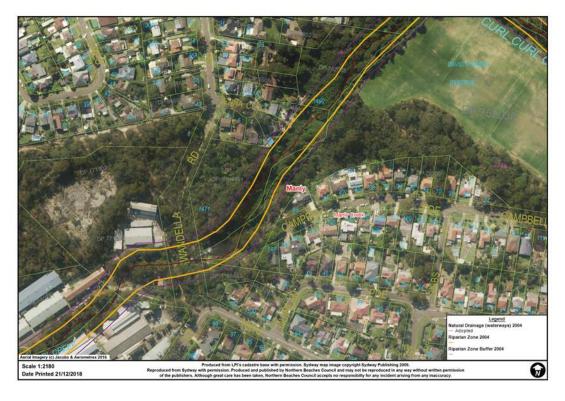

Figure 6 – Manly Creek Riparian Zone and Buffer (Warringah Council, 2000)

Connected Corridors for Biodiversity project by Southern Sydney Regional Organisation of Councils in December 2016

This project provides Council with tools for habitat corridor mapping across Sydney and identifies the subject lots as 'Priority Habitat'. The main aim of the Connected Corridors for Biodiversity project was to create tools to be used by Councils to facilitate increased habitat connectivity. This included a preparation of a habitat corridor map.

The subject lots and surrounding land are mapped as "Priority Habitats" within the Connected Corridors for Biodiversity project by Southern Sydney Regional Organisation of Councils in December 2016. See Figure 7.

Figure 7 – Biodiversity Corridor linking Manly Dam to the coast (SSROC 2016), approx. location of subject lots shown in red.

The Sydney Metropolitan Catchment Management Authority V3 mapping (OEH 2016)

The Sydney Metropolitan Catchment Management Authority map some areas of the subject lots and surrounding land as being made up of 3 Plant Community Types (PCT) (Figure 8).

- PCT 1250 S_DSF09: Coastal Sandstone Gully Forest
- PCT 1783 S_DSF11: Sydney North Exposed Sandstone Woodland
- PCT 1824 S HL08: Coastal Sandstone Heath-Mallee

Coastal Sandstone Gully Forest (PCT1250, S_DSF09) is known to support at least five (5) rare plant species (Angophora crassifolia, Darwinia procera, Eucalyptus luehmanniana, Hibbertia nitida and Lomandra brevis), and fourteen (14) species rare in northern Sydney (Amyema pendulum, Blechnum minus, Deyeuxia decipiens, Eucalyptus capitellata, E. scias, Gahnia radula, Juncus pallidus, Lepidosperma elatius, Lycopodiella cernua, Ophioglossum lusitanicum, Prostanthera denticulata, Utricularia australis, U. uliginosa and Xanthorrhoea minor).

The majority of the bushland within the subject lots and surrounding land have not been mapped as a native PCT however the Biodiversity Study being undertaken with the Planning Proposal will determine and map PCTs across the area.

Figure 8 – SMCMA V3 mapping (OEH 2016)

Manly Creek/Mermaid's Pool Restoration Plan (Total Earth Care 2003)

In 2003, Total Earth Care Pty Ltd was commissioned by Warringah Council to prepare a Restoration Plan for the Mermaid's Pool reach of Manly Creek. The Study Area encompassed all publicly owned land on both sides of Manly Creek between the Manly Dam wall (to the west) and Condamine Street (to the east), excluding the playing fields within David Thomas Reserve and Millers Reserve. This study included a flora and fauna field survey, an assessment of habitat, a discussion of threats to biodiversity, and recommended bushland restoration methods.

The primary recommendation of the Plan is that a comprehensive and ongoing biotic survey be undertaken so that the bushland management recommendations are amended periodically to ensure the study area is appropriately managed. This plan also suggested that the species lists provided in the Plan should be included in the Manly Dam Reserve species list. Council's Bushland and Biodiversity team advises the plans and actions associated with this Plan will assist in integrating the management of these contiguous bushland areas. The Planning Proposal, with the associated Biodiversity Study will fulfil the primary recommendation of this project.

Manly Dam species list project (Northern Beaches Council 2018)

This ongoing project lists species recorded within Manly Dam. The list currently contains as many as 97 bird species, 23 reptile species, 9 amphibian species, 13 mammal species, 6 fish species, and 320 flora species. Two threatened mammal species previously recorded are now locally extinct, the *phascolarctos cinereus* Koala and *dasyurus maculatus* Spotted-tailed Quoll.

Biodiversity Assessment on nearby Sydney Water land (Sydney Water 2018)

In 2018, Sydney Water undertook a comprehensive survey on their land adjacent the Manly Dam wall, nearby to the subject lots. This survey identified an additional threatened species occurring including *chalinolobus dwyeri* Large-eared pied bat (Vulnerable under the BC Act 2016 and the EPBC Act 1999), which has not been recorded within 5 km of the site in the NSW BioNet database.

The subject lots and surrounding land contain suitable potential breeding habitat for the chalinolobus dwyeri Large-eared pied bat, which is listed as a SAII under the BC Act. "Habitat" for bat species is defined by OEH as, all areas of potential habitat on the subject land where the species is determined to be present. Potential habitat for this species is defined by OEH as "Potential breeding habitat is PCTs associated with the species within 100m of rocky areas

containing caves, or overhangs or crevices, cliffs or escarpments, or old mines, tunnels, culverts, derelict concrete buildings. Surveys must be undertaken as per the Threatened Bat Survey Guide to confirm breeding habitat". The study also notes the potential presence of 2 other threatened bat species.

Council's Bushland and Biodiversity team advise this project demonstrates that previously unrecorded threatened species are still being recorded within the locality and that further biodiversity surveys are required to determine whether threatened species or species habitat are located on the land.

Manly Warringah War Memorial Park Plan of Management

While this Plan of Management does not apply to the subject Crown land for rezoning, it is relevant in that it states that 'Bushland linkages need to be protected and enhanced to enable movement of flora and fauna between reserves in Warringah' (p61). In this regard the subject land parcels are recognised as important strategic Bushland linkages in the vicinity of, and connected with Manly Warringah War Memorial Park.

Other Local Reports and Investigation

Council has been advised of Community investigations and support for the establishment of a small bird habitat corridor comprising the Mermaid Pool locality and outlined by Greater Sydney Landcare Network (and Save Manly Dam Catchment Committee). These strategic initiatives are supported by the Greater Manly Residents Forum, Birdlife Australia, Humaine Society International and STEP Inc. Current investigations support the suitability of the proposed corridor given the large areas of dense undisturbed vegetation, connectivity with surrounding reserves, and refuge from other predation and other impacts on the fringe of residential areas.

A Species Impact Statement by Kleinfelder (for Manly Vale Public School) identified small birds of significance (Eastern Spinebill, Superb Fairy Wren, Red Browned Finch, Spotted Pardalote, New Holland Honey Eater, White Browned Scrub Wren). Further independent surveys identified Scarlet Honey Eater, Little Wattlebird, Brown Thornbill & Black Faced Cuckoo Shrike. Upstream at Manly Dam Reserve over 80 bird species have been recorded.

5. Is the Planning Proposal consistent with applicable State Environmental Planning Policies?

The Planning Proposal is consistent with applicable State Environmental Planning Policies as shown in the following Table 1.

Table 1. Compliance with State Environmental Planning Policies (SEPPs)

SEP	Ps (as at September 2017)	Applicable	Consistent
1	Development Standards	NO	N/A
14	Coastal Wetlands	NO	N/A

6. Is the planning proposal consistent with applicable Ministerial Directions?

Applicable Directions are summarised at Attachment 1 and comments on each of the applicable directions is provided in Table 2 below. The following comments are provided regarding where the Planning Proposal may be inconsistent with the terms of any direction, and any such inconsistencies are addressed below as follows:

Direction 3.1 Residential Zones

This direction applies as the Planning Proposal affects land within an existing residential zone i.e. Zone R2 Low Density Residential.

Under clause 3.1(1) of the Direction, the objectives of this direction are:

- (a) to encourage a variety and choice of housing types to provide for existing and future housing needs,
- (b) to make efficient use of existing infrastructure and services and ensure that new housing has appropriate access to infrastructure and services, and
- (c) to minimise the impact of residential development on the environment and resource lands.

Under clause 3.1(4) & (5) of the Direction, the Planning Proposal must:

- (4) include provisions that encourage the provision of housing that will:
- (a) broaden the choice of building types and locations available in the housing market, and
- (b) make more efficient use of existing infrastructure and services, and

- (c) reduce the consumption of land for housing and associated urban development on the urban fringe, and
- (d) be of good design.
- (5) in relation to land to which this direction applies:
- (a) contain a requirement that residential development is not permitted until land is adequately serviced (or arrangements satisfactory to the council, or other appropriate authority, have been made to service it), and
- (b) not contain provisions which will reduce the permissible residential density of land.

The Planning Proposal is inconsistent with the above requirements as the proposed rezoning will not provide for residential development on the subject land. In this regard, a planning proposal may be inconsistent with the terms of this direction only if the relevant planning authority can satisfy the Director-General of the Department of Planning (or an officer of the Department nominated by the Director-General) that the provisions of the planning proposal that are inconsistent are:

- (a) justified by a strategy which:
- (i) gives consideration to the objective of this direction, and
- (ii) identifies the land which is the subject of the planning proposal (if the planning proposal relates to a particular site or sites), and
- (iii) is approved by the Director-General of the Department of Planning, or
- (b) justified by a study prepared in support of the planning proposal which gives consideration to the objective of this direction, or
- (c) in accordance with the relevant Regional Strategy, Regional Plan or Sub-Regional Strategy prepared by the Department of Planning which gives consideration to the objective of this direction, or
- (d) of minor significance.

The provisions of the Planning Proposal that are inconsistent are considered to be of minor significance for the following reasons:

- While the land is subject to an existing residential zone, the Planning Proposal supports and fully justifies a future zone that is not a residential zone in which residential development is not permitted or proposed to be permitted
- The Planning Proposal is confined to 4 parcels of Crown Land which comprises part of a wider Open Space Reserve for public purposes.
- The provisions of a variety and choice of housing types and the existing and future housing needs will not be effected by the Planning Proposal
- The environmental studies and strategies identified in this report provide detailed support for the proposed non-residential zoning of the land
- The Planning Proposal seeks to minimise the impact of residential development on the environment by rezoning the land to Zone RE1 Public Recreation, consistent with the remainder or the Public Reserve and consistent with the ecological, scientific, cultural and aesthetic values of the land.

Direction 6.2 - Reserving Land for Public Purposes

This direction applies as the Planning Proposal seeks to create a new zone requiring the approval of the relevant public authority and the Director-General of the Department of Planning (or an officer of the Department nominated by the Director-General).

Under clause 6.2(1) of the Direction, the objectives of this direction are:

- (a) to facilitate the provision of public services and facilities by reserving land for public purposes, and
- (b) to facilitate the removal of reservations of land for public purposes where the land is no longer required for acquisition.

Under clause 6.2(4) of the Direction, the Planning Proposal must:

(a) not create, alter or reduce existing zonings or reservations of land for public purposes without the approval of the relevant public authority and the Director-General of the Department of Planning (or an officer of the Department nominated by the Director-General).

Other requirements apply at paragraphs (5)-(7) in respect of when a Minister or public authority may request that Council reserve land for a public purpose and in other circumstances where the land is to be acquired under Division 3 of Part 2 of the Land Acquisition (Just Terms Compensation) Act 1991.

The Planning Proposal seeks to rezone certain Crown Land parcels from a residential zone to Zone RE1 Public Recreation. It has been prepared with the preliminary support of the Regional Crown Lands Office as detailed in the report. The Planning Proposal does not involve the reservation of land and does not involve changes to the LEP Land Acquisition Map. Preliminary advice from the Department of Planning and Environment states that statutory consultation with the Crown Land Office would likely be a condition of any Gateway Determination.

Table 2: Ministerial (Local Planning) Directions – Summary of Applicable Directions

Ministerial Direction	Comment
2 Environment and Heritage	
2.1 Environment Protection Zones	
The objective of this direction is to protect and conserve environmentally sensitive areas.	The Planning Proposal seeks to rezone certain lands which will facilitate the protection and conservation of environmentally sensitive areas and does not reduce any environmental protection standards that apply to the land.
2.3 Heritage Conservation	
The objective of this direction is to conserve items, areas, objects and places of environmental heritage significance and indigenous heritage significance.	While the Planning Proposal applies to certain lands which are listed as heritage significant, the proposed rezoning is not considered to impact on the heritage significance of any listed heritage item as detailed in the Planning Proposal.
3. Housing, Infrastructure and Urban	-
Development	
3.1 Residential Zones	
 The objectives of this direction are to: a) encourage a variety of choice of housing types to provide for existing and future housing needs, b) to make efficient use of existing infrastructure and services and ensure that new housing has appropriate access to infrastructure and services, and c) To minimise the impact of residential development on the environment and resource lands. 	Inconsistency with the terms of this Direction is addressed in accordance with the requirements of the Direction above in detail.
3.4 Integrating Land Use and Transport	
The objective of this direction is to ensure that urban structures, building forms, land use locations, development designs,	This direction applies as the planning proposal will alter zones or provisions relating to urban land, including land zoned

subdivision and street layouts achieve the following planning objectives: (a) improving access to housing, jobs and services by walking, cycling and public transport, and (b) increasing the choice of available transport and reducing dependence on cars, and (c) reducing travel demand including the number of trips generated by development and the distances travelled, especially by car, and (d) supporting the efficient and viable operation of public transport services, and (e) providing for the efficient movement of freight.	for residential purposes. In this regard the planning proposal is consistent with the aims, objectives and principles of Improving Transport Choice – Guidelines for planning and development (DUAP 2001).
4. Hazard and Risk	
4.1 Acid Sulfate Soils	
The objective of this direction is to avoid significant adverse environmental impacts from the use of land that has a probability of containing acid sulfate soils.	While the Planning Proposal applies to certain lands contained on LEP Acid Sulfate Soils Planning Maps, the existing provisions adequately regulate works and are consistent with the Acid Sulfate Soils Planning Guidelines.
4.3 Flood Prone Land	
The objectives of this direction are: (a) to ensure that development of flood prone land is consistent with the NSW Government's Flood Prone Land Policy and the principles of the Floodplain Development Manual 2005, and (b) to ensure that the provisions of an LEP on flood prone land is commensurate with flood hazard and includes consideration of the potential flood impacts both on and off the subject land.	While the Planning Proposal partly applies to certain lands identified as Flood Prone Land, the existing provisions adequately regulate works and are consistent with the NSW Flood Prone Land Policy and the principles of the Floodplain Development Manual 2005. Water management facilities may be designed and constructed in accordance with these requirements more readily on larger sites identified in the planning proposal.
4.4 Planning for Bushfire Protection	
The objectives of this direction are: (a) to protect life, property and the environment from bush fire hazards, by discouraging the establishment of incompatible land uses in bush fire prone areas, and (b) to encourage sound management of bush fire prone areas. 6. Local Plan Making	Appropriate consideration is made of land mapped as bushfire prone land across the LGA.
6.1 Approval and Referral Requirements	
The objective of this direction is to ensure that LEP provisions encourage the efficient and appropriate assessment of development.	The Planning Proposal is consistent with the terms of this direction as follows: a) provisions that require the concurrence, consultation or referral of DAs to a Minister or public authority are minimised (b) no provisions are contained in the Planning Proposal requiring concurrence,

	consultation or referral of a Minister or public authority without approval prior to undertaking consultation. (c) no development is identified as designated development.
6.2 Reserving Land for Public Purposes	
The objectives of this direction are: (a) to facilitate the provision of public services and facilities by reserving land for public purposes, and (b) to facilitate the removal of reservations of land for public purposes where the land is no longer required for acquisition.	Approval requirements of the relevant public authority and Department Secretary under the terms of this Direction are addressed above in detail.
6.3 Site Specific Provisions	
The objective of this Direction is to discourage unnecessarily restrictive site specific planning controls.	The Planning Proposal does not seek to allow a particular development proposal under the terms of the Direction.
7 Metropolitan Planning	
7.1 Implementation of A Plan for Growing Sydney	
The objective of this direction is to give legal effect to the planning principles; directions; and priorities for subregions, strategic centres and transport gateways contained in A Plan for Growing Sydney.	The Planning Proposal is consistent with the NSW Government's Greater Sydney Regional Plan "A Metropolis of Three Cites – connecting people" published on 18 March 2018, as outlined in Part 3, Section B of this report.

7. Other Legislation under the Strategic Planning Framework

Biodiversity Conservation Act 2016

Biodiversity Values Mapping by the Office of Environment and Heritage (OEH) in 2018 under the Biodiversity Conservation Act 2016 acts as one of the thresholds for entry into the Biodiversity Offsets Scheme. This map is published by the OEH under the Biodiversity Conservation Regulation 2017. This mapping identifies 'Biodiversity Value' within some parts of the subject lots due to the presence of species with potential for 'serious and irreversible impacts on biodiversity values under section 6.5 (2) of the Act".

Lot 7369 DP 1165551 is mapped as having "Biodiversity Value" on the Biodiversity Values Map due to the presence of potential habitat for *prostanthera marifolia* Seaforth Mintbush. Habitat for this species is currently only known from the northern Sydney suburb of Seaforth and has a very highly restricted distribution within the Sydney Basin Bioregion.

prostanthera marifolia, Seaforth Mintbush has been identified as a species where there is potential for serious and irreversible impacts because of the very small population (principle 2) and its very limited distribution (principle 3). To date no individuals have been recorded within the lot. The upcoming Biodiversity Study will include targeted surveys to investigate and map suitable habitat at a site-scale and determine presence/absence of the species.

Aboriginal Land Rights Act 1983

The Planning Proposal comprises certain lands subject to undetermined land claims under the Aboriginal Land Rights Act 1983 (see extract of provision below). Having regard to these interests, the Crown Lands Office and Department of Planning and Environment have been

advised during the drafting of the Planning Proposal that consultations with the Metropolitan Local Aboriginal Land Council will be undertaken during Community Consultation /Public Exhibition.

The Department of Planning and Environment have advised that 'there is no restriction on a planning proposal to rezone land proceeding where the relevant land is subject to a pending land claim'.

- 36 Claims to Crown lands
- (1) In this section, except in so far as the context or subject-matter otherwise indicates or requires:
- claimable Crown lands means lands vested in Her Majesty that, when a claim is made for the lands under this Division:
- (a) are able to be lawfully sold or leased, or are reserved or dedicated for any purpose, under the Crown Lands Consolidation Act 1913 or the Western Lands Act 1901,
- (b) are not lawfully used or occupied,
- (b1) do not comprise lands which, in the opinion of a **Crown Lands Minister**, are needed or are likely to be needed as residential lands,
- (c) are not needed, nor likely to be needed, for an essential public purpose, and
- (d) do not comprise lands that are the subject of an application for a determination of native title (other than a non-claimant application that is an unopposed application) that has been registered in accordance with the Commonwealth Native Title Act, and
- (e) do not comprise lands that are the subject of an approved determination of native title (within the meaning of the Commonwealth Native Title Act) (other than an approved determination that no native title exists in the lands).

Section C – Environmental, social and economic impact

8. Is there any likelihood that critical habitat or threatened species, populations or ecological communities, or their habitats, will be adversely affected as a result of the proposal?

No adverse effects on critical habitat or threatened species, populations or ecological communities, or their habitats are likely as a result of the proposal.

The proposed rezoning of certain lands will introduce new zone objectives and land use permissibility for the land that will provide for a range of recreational settings, activities and compatible land uses that will better address the local flora and fauna which characterise the land. The planning provisions will also better protect and enhance the natural environment and the values of the land. The likelihood that critical habitat or threatened species, populations or ecological communities, or their habitats may be identified on the land will warrant further ecological study identified in the Planning Proposal.

Council's Bushland and Biodiversity Team review of Office of Environment & Heritage datasets of threatened species, populations in the vicinity (BioNet 10 x 10 km search - report generated on 18/12/2018 4:23 PM), returned 99 threatened and migratory species over 3,458 records. Since 2008, thirty-nine (39) of these species have been recorded in the area with 2,714 records.

The most abundant threatened species recorded within the locality is the Prostanthera marifolia Seaforth Mintbush, which is listed as Critically Endangered under both the NSW Biodiversity Conservation Act 2016 (BC Act 2016) and Commonwealth Environment Protection & Biodiversity Conservation Act 1999 (EPBC Act 1999), and the Cercartetus nanus Eastern Pygmy-possum, Ninox strenua Powerful Owl, Varanus rosenbergi Rosenberg's Goanna and

Pseudophryne australis Red-crowned Toadlet, all listed as Vulnerable under the NSW BC Act 2016.

The Biodiversity Study being prepared in conjunction with the Planning Proposal will identify the presence or high likelihood of any threatened species currently utilising the subject lots, as well as map important habitat and corridors for all local native species.

9. Are there any other likely environmental effects as a result of the planning proposal and how are they proposed to be managed?

Council's Bushland & Biodiversity and Coast & Catchments teams have assisted in the preparation of the Planning Proposal and confirm that the likely environmental effects of the planning proposal will be to better protect manage and restore public land with ecological, scientific, cultural or aesthetic values.

The studies and mapping outlined and discussed in this Planning Proposal provide evidence that the subject lots are highly likely to contain habitat for local native species including threatened species, and are also likely to function as an important wildlife corridor, particularly for local native species including a range of bird species.

Council's Natural Environment and Climate Change Division advise as follows In relation to the proposed Zone (RE1) Objectives for the subject land:

Objective 1: To enable land to be used for public open space or recreational purposes.

Response: The local community in conjunction with Save Manly Dam Catchment Committee have been working to protect the bushland around Mermaid Pool since 2002. The Mermaid Pool Volunteers meet regularly on the 4th Saturday of every month.

The area is well known locally for its beauty and natural resources, and is already heavily used for public recreation activities including bush walking, and picnics. This connects well with adjacent land for public recreation, including Manly Dam and David Thomas Reserve facilities.

The site has a long history of human-use and enjoyment for recreational activities. The area contains two (2) listed Aboriginal Places. The rezoning of the land will ensure the continuation of these activities at the site.

 Objective 2: To provide a range of recreational settings and activities and compatible land uses.

Response: As well as providing a range of recreational activities listed above, the subject lots and surrounding land provide a range of opportunities for educational activities such as community engagement programs, school educational programs, and the continuation of ongoing volunteer bush regeneration.

• Objective 3: To protect and enhance the natural environment for recreational purposes.

Response: As stated above, this land is well known for its beauty and natural resources, with stunning waterfalls, waterholes and sandstone cliff-faces in an otherwise urban landscape. The subject lots form part of a locally significant environmental feature and heritage site which should be protected and conserved, to be enjoyed by many future generations.

 Objective 4: To protect, manage and restore public land that is of ecological, scientific, cultural or aesthetic value.

Response: The subject land has important ecological, scientific, cultural and aesthetic value. Ecologically, this land provides potential and known habitat for hundreds of local native species. Scientifically, this land provides potential habitat for state and Commonwealth listed threatened species, including the Critically Endangered *Prostanthera marifolia* Seaforth Mintbush. Culturally, this land contains two (2) Aboriginal Places. Aesthetically, this land provides stunning natural land forms including waterfalls, and sandstone cliffs and escarpments.

 Objective 5: To prevent development that could destroy, damage or otherwise have an adverse effect on those values.

Response: From an ecological perspective, any development, except those permissible within RE1 zoning, may impact or otherwise have an adverse effect on the ecological, scientific, cultural and aesthetic values listed above and described throughout this referral.

The Biodiversity Study

A more detailed study is proposed to be undertaken by ecological consultants in conjunction with the Planning Proposal to assist with the future environmental management of the land. This additional study is being prepared by suitably qualified ecological consultants.

The objectives of the study are as follows:

- Determine and map the NSW Plant Community Types (PCTs) on all vegetated areas;
- Undertake a comprehensive field survey including complete flora and fauna inventory, targeting threatened flora and fauna as well as small cryptic birds and introduced species, in accordance with relevant government guidelines and including the most upto-date survey methods;
- Record and map important habitat features and wildlife corridors, including known threatened species and small bird habitat, and;
- Report on findings and provide general recommendations to improve biodiversity values in the future.

The project is expected to be completed by July 2019.

10. Has the Planning Proposal adequately addressed any social and economic effects?

The Planning Proposal will well ensure social and economic effects are addressed in the zoning of certain lands for Public Recreation (RE1).

Aboriginal Heritage Office Comments

Comments received from the Aboriginal Heritage Office in relation to the Planning Proposal are as follows:

"Recorded Aboriginal rock art sites exist within the locality of the proposed rezoning ranging from paintings in excellent condition to those faded with time, damaged by graffiti and vandalism and obscured by vegetation. Each individual site is considered to be of high significance by the Aboriginal community. Overall, they have national and international significance due to their age (some sites dated over 6000 years, and many have occupation evidence going back at least 4000 years old), the style and variety of art, their level of preservation in the context of Australia's biggest city, the representative variety of different overlapping site types, and their association with the place where Europeans first settled Aboriginal land.

These sites in this location are important to the custodians, the Metropolitan Local Aboriginal Land Council (MLALC), to local Aboriginal people and to Aboriginal communities across Australia where they symbolise the survival of Aboriginal culture even where the impacts of invasion have been the longest and hardest felt. This heritage is also of increasing importance to the wider public. Local residents have grown up with the sites and many have undertaken Sites Awareness training to learn more. There are many local people involved in reconciliation issues who appreciate the Aboriginal heritage of their local area and are active in trying to protect it. Visitors from Australia and internationally value the heritage and appreciate the opportunity to see at first hand Aboriginal heritage in Sydney, not just 'outback'.

No rock art sites are currently specifically listed on heritage registers. This is not due to the paucity of significant rock art sites but due to historical neglect of Indigenous heritage in this context and a general policy of keeping such sites low profile."

Section D - State and Commonwealth interests

11. Is there adequate public infrastructure for the planning proposal?

Yes, the Proposed Development is supported by adequate infrastructure.

12. What are the views of State and Commonwealth public authorities consulted in accordance with the Gateway determination?

The Planning Proposal is being prepared in accordance with consultation guidelines and provisions prepared by the Department of Environment and Planning and all statutory consultation will occur in accordance with the requirements of any future Gateway determination.

NSW Department of Industry - Lands and Water

Prior to Gateway determination, Council consulted with NSW Department of Industry - Lands and Water - Regional Services (Crown Lands Office). They advised in correspondence dated 15 January 2019 that "The resolution of Northern Beaches Council to rezone R2 land to RE1 land seems worthwhile." Other comments included:

- Lot 7371 DP1165577 'this land is a relatively steep strip of R2 land at back of properties arguably unusable as R2 - recently subject of Crown land weed control work. Worth rezoning to RE1.'
- 'Unmade southern end of Wandella Rd affords a vegetated curtilage to the Mermaid Pool. Desirably, this road can be added to RE1 land to help protect the Mermaid Pool.'

The Department is also consulting with Council regarding a range of other projects including the Crown Land Negotiation Program. Councils Property Assets Team has advised that the lands under the Planning Proposal are also being considered in these negotiations. All necessary consultations are to proceed under the statutory provisions and processes of the Planning Proposal.

Department of Planning and Environment (Region Team)

Council has consulted with the Department of Planning and Environment (Region Team). The Department advises 'there is no restriction on a planning proposal to rezone land proceeding where the relevant land is subject to a pending land claim under the Aboriginal Land Rights

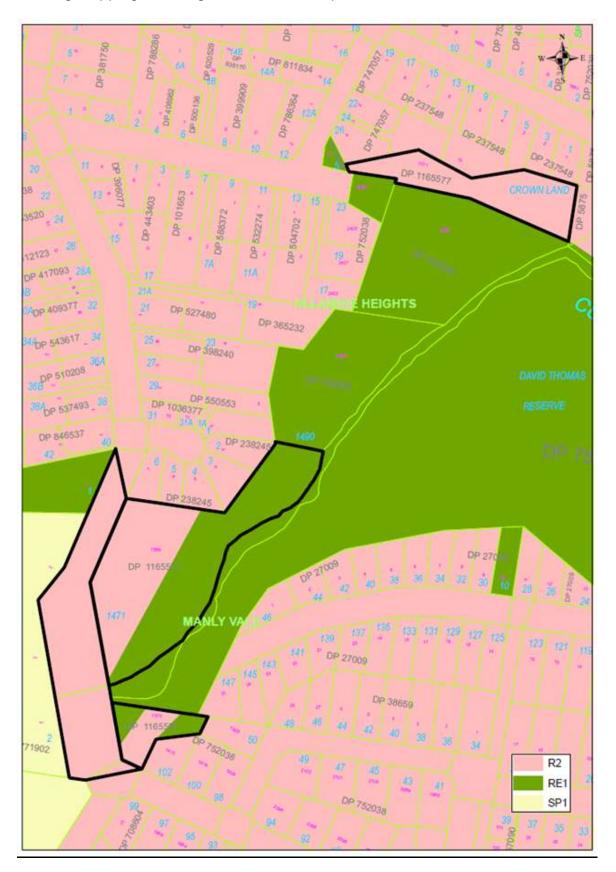

Act." (see Section B.7 of this report). The Department confirmed that any future Gateway would likely require consultation with Crown Lands and the relevant Metropolitan Local Aboriginal Land Council.

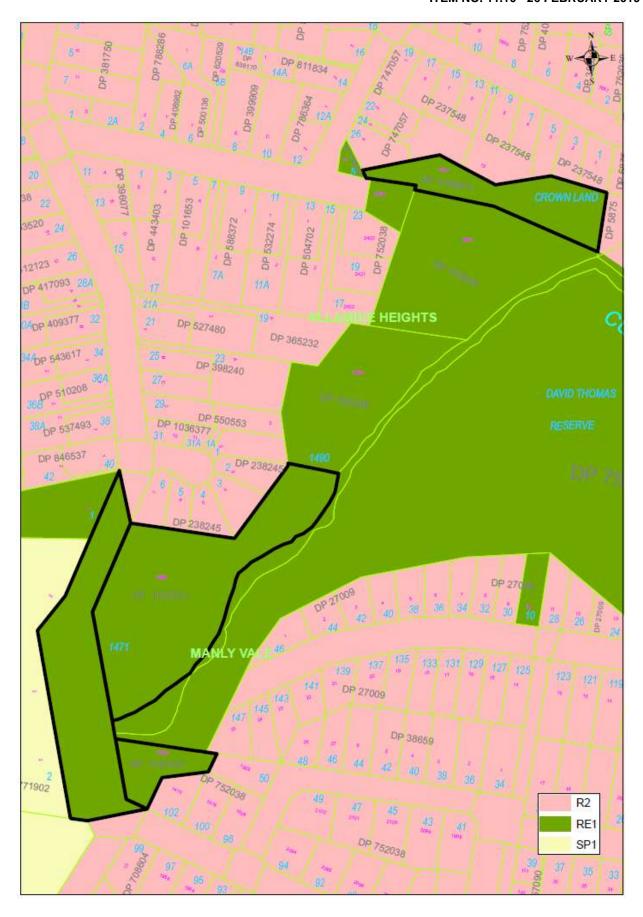

Part 4 - Maps

Existing Mapping - Zoning - WLEP2011 Map LZN_00

Proposed Mapping Amendment – WLEP2011 Map LZN_00

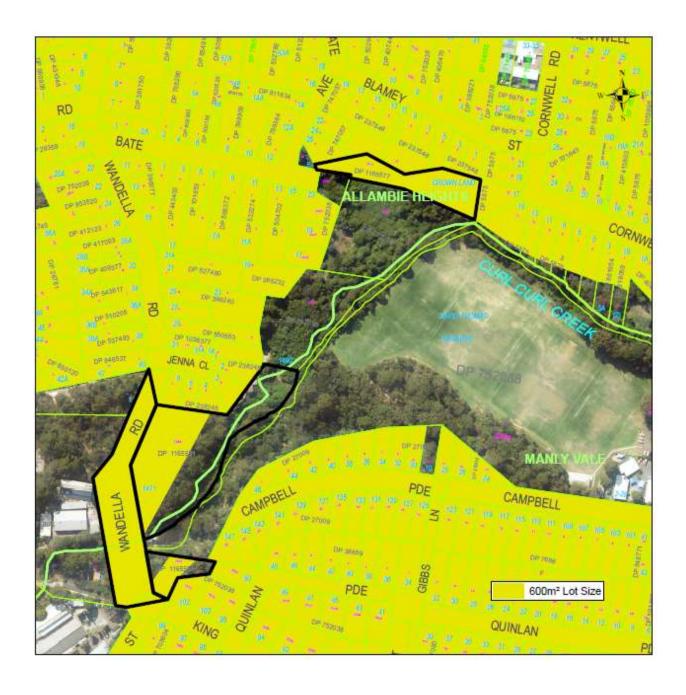

Existing Mapping - WLEP2011 Map HoB_00 (Height of Building)

Proposed Mapping Amendment – WLEP2011 Map HoB_00 (Height of Building)

Existing Mapping Amendment - WLEP2011 Map LZN_00 (Minimum Lot Size)

Proposed Mapping Amendment – WLEP2011 Map LZN_00 (Minimum Lot Size)

Part 5 - Community Consultation

Council will place the Planning Proposal on public exhibition in accordance with future Gateway Determination and consistent with Council's Community Engagement Policy including:

- A public notice in the Manly Daily notifying of the public exhibition;
- Letters to key stakeholders;
- Hard copies of the exhibition material at Council's offices; and
- Electronic copies of the exhibition material on Council's website.

The Gateway determination will confirm the public consultation that must be undertaken.

In particular, the community consultation for the Planning Proposal will include direct consultation with at least the following State Agencies, other Agencies and Community Groups

<u>Department of Industry – Lands and Water:</u> The subject lots are Crown Land parcels and preliminary consultations in the drafting of the Planning Proposal provide some indicative support for the proposal in that the proposal 'seems worthwhile'. However more detailed statutory consultation is intended under conditions of any Gateway Determination.

Metropolitan Local Aboriginal Land Council: Council is aware of current land negotiations under the Aboriginal Land Rights Act in relation to the land subject to the Planning Proposal (see Section B.7 of this report). The Metropolitan Local Aboriginal Land Council will be consulted in relation their interests in over the land.

<u>Save Manly Dam Catchment Committee</u>: This environmental conservation group have been actively involved with the subject land since 2002, including the restoration of Mermaid Pool. This Committee advocates for the establishment of a 'small bird habitat corridor' for the locality and is a relevant community stakeholder in relation to the Planning Proposal.

Part 6 - Project Timeline

Task	Anticipated timeframe
Referral to Department of Planning & Environment for Gateway	March 2019
determination	
Issue of Gateway determination	April 2019
Government agency consultation (if required)	April 2019
Public exhibition period	May 2019
Consideration of submissions	June 2019
Detailed Biodiversity Study complete	June 2019
Report to Council to determine Planning Proposal	July 2019
Submit Planning Proposal to the Department of Planning &	August 2019
Environment and Parliamentary Counsel for LEP drafting and	
publication
