

Long Reef Surf Club - comments from community drop in session - Sat 3 June 2017

<i>Tell us what you think?</i>	<i>What ideas or concepts would you like to be considered for the renewal of the Surf Life Saving Club</i>	<i>What do you value about the Long Reef beach area?</i>	<i>Any other comments</i>
Well vegetated dune system	Upgrading of the kiosk	Clean beach, nice walkway around headland, great golf course, strong community influence	Lots of consultation!
Dune restoration required as part of overall space not build	Live music with stage, <u>invite bands!</u> Trivia nights etc.	Best beach on Northern Beaches. Very attractive landscape so would hate it to be encroached upon. Love the relative isolation of the area	
Recycled bins!	Same footprint - 2 stories <u>MAX</u>	Off the beaten track comparatively - so not as over-run by people discovering by accident. Parking not AS BAD as other Northern Beaches. Very family friendly / oriented feel. Appropriate shade	
A big park	More storage		
Possible concern re security for Board Rider Trailer	Drainage - southerly - blows sand into the drainage		
Another BBQ	Clean up streamlines		
Park and kid area for after nippers	Solar panels for power and hot showers :-)		
More picnic areas and more bins	Weddings *		
Outside warm showers for public	Appropriate size for large number of members and nippers		
Retain natural vegetation	Storage space for board riders similar size to trailer		
Improved access to the beach	On existing footprint		
Don't expand car park. Maintain informal	Lots of natural light		
Open natural spaces	For conferences and learning - <u>Meeting Room</u> !!!		
Another shelter shed south of BBQ	To hire out to community groups - Bigger Hall - for other community users		
Less campers	Two levels, 1 for kids (nippers) and wet stuff. 2 for dry, café bar and garden... live concerts every Sunday or Saturday etc.		
No reduction in public amenity space or light	Bar and café and ice cream - kiosk with hot foods etc.		
Value about the beach area	No restaurant		
Strong community influence	Café may struggle...		
Nice walkway around headland	Markets, table tennis, jumping castles A DAY OF FUN! Once a week or month		
Clean beach	Café with simple fresh food		
Environmental issues	Trailer Bolt (sic) storage space 'community'		
	:-) Hi rooftop deck for parties		
	For cadets: fun activities and excursions, more sleepovers, more get together		
	Small domestic-size wind turbine		
	Clean lines - fit in with environment - clean up and workable for all users		
	Rainwater tanks for amenities		
	I would be interested in upgrading the kiosk to a café to provide the community with a wider choice of healthy and delicious food and drinks. To provide the families with a place to relax and enjoy whilst waiting for their family members and friends to enjoy their activities. I'd like to talk to someone in more depth in the future. Thank you.		
	Two storey complex (no higher) on same site footprint OK. No restaurant. No concreting grass car park		
	Same site development no higher than current tower (i.e. 2 storeys). Ideal as ecologically, aesthetically compatible. More rubbish bins in car park. Another BBQ area for southern car park. Seating for elderly / disabled including towards back of car park to take advantage of view. Solar panel inclusion for hot showers

<i>Tell us what you think?</i>	<i>What ideas or concepts would you like to be considered for the renewal of the Surf Life Saving Club</i>	<i>What do you value about the beach area?</i>	<i>Any other comments?</i>
Stormwater drainage needs improving	Courtyard and good access to the beach	How will it be paid for???	How will it be paid for? Several million dollars is hard to find for a non-profit organisation
Access from Building to water needs improving	Broader Community Access	Green space - the whole setting	Removal of a section of dune so easy access, and view of beach from club of equipment. We are only surf club on east coast of Australia that can't see the beach
	Needs to be financially sustainable	Best / accessible beach on the Northern Beaches	Current building floods since artificial sand dunes created in mid 1980's requiring stormwater to be collected and piped south west via car park system, Artificial sand dune has built up over decades to prevent overviewing of beach (safety issue) and restricts access for rescue craft and equipment (safety issue), The lack of support for a valuable community organisation by the elected representatives to upgrade or replace overcrowded run-down facilities over the past decade is a disgraceful inditement of spineless politicians
	Should not look like an RSL	Lots of fish and birds	
	SLSC needs upgraded facilities	Surf and natural beauty of area - rocks / dunes etc.	
	Other users space - lifeguards, other groups	Area is unique	
	BBQ and social space outdoors	That it has a wildness about it. No houses and shops or beachfront. A unique headland. Lots of green space, lagoon	
	Attractive to new members who volunteer to be Life Savers e.g., gym, café	No houses, natural beauty, birds, fish and sea life. Beautiful view of dune and headland - green, sand and sea perfect!	
	Daytime not evening / night	Relatively unspoilt environment - clean, lack of development, topographical features, location in relation to my dwelling, the standard of volunteer surf life savers and patrols	
	Café (of sorts)		
	Function room (appropriate size with a bar)		
	Nippers program and gear space		
	A courtyard to carry that unique characteristic forward		
	Needs adequate storage (incl. IRB's)		
	Shared space with other community groups		
	Want to see the water from the building		
	Appearance - not to look like an RSL or stand out. It should blend in with this beautiful landscape. Keep a courtyard which is a unique feature of current Long Reef. A meeting place in all seasons		
	Kiosk. BBQ, courtyard, storage meeting room, hall hire, good amenities. Hot water that extends to ladies showers when men are using them too!		
	Removal of artificial sand dune east of surf club, to allow stormwater drainage, and ease of access for personnel and equipment onto the beach, a building that has view of the beach and surf immediately adjacent the surf life saving facilities, adequate accessible storage of equipment, good standard of cafe and public amenities, larger function room, better oriented for solar access.
