Issue	Resident Comment	Council Response
Signage	The raised crossing will definitely improve safety, however, the signage needs to be much clearer. Could it be a 'children crossing' sign or one that flashes? The more visible the signage the better.	All signage will be consistent with RMS guidelines.
Additional crossing	Can we please have another pedestrian crossing at BYRA sailing club, as all the kids that sail and use the park are in danger? The section is used as a speedway.	This crossing will be included on a list of 'out of scope' projects to be considered.
Illegal Overtaking	Due to the queuing vehicles turning left into Loquat Valley Road, motorist become impatient and overtake illegally over the double lines at speed. A median or barrier of some sort is needed	Council will trial plastic medians between the driveways to No.1967 and 1965 to prevent motorist from illegally overtaking. Please note entry and exits to these driveways will not be impeded.
Faded Lines	The zigzags on the road are faded and need to be repainted	Council will request for the maintenance team or contractors to repaint the faded lines
Roundabout and Dedicated Left Lane Turn	If a roundabout was installed at this intersection I believe it would help alleviate this situation. Particularly if a turning lane on Pittwater Rd into Loquat Valley Rd could be accommodated. Thank you very much for gathering feedback.	This crossing will be included on a list of 'out of scope' projects to be considered.
